

The reversible valve technology
for pool heat pumps.

Reversible valve

Empowered defrost mode
for an extended season

**Soundproofed
enclosure**

The Moov Reversible

This heat pump works with a renowned single-speed compressor. Its mission is to heat your swimming pool as much as the weather conditions allow, while providing an impressive level of silence and unrivaled value for money!

The perks

Spiraled titanium heat exchanger

Our titanium heat exchanger features a 30% increase in heating surface area, significantly enhancing the overall performance of your product. A larger surface area facilitates greater heat transfer, ensuring a more efficient heating process and, ultimately, warmer water for your pool.

Dual rotary compressor

Based on the innovation of the double mechanism, the two rotors work together to balance out the rotary shake. This offers increased efficiency and a more silent operation.

Soundproof enclosure

The entire mechanical chamber of the product is shielded by noise-reducing walls, reinforced with sound-absorbing pads to minimize sound disruption.

Built-in Wi-Fi module

Control your device remotely with the Moov App.

Moov Reversible	MR550X	MR750
Maximum Pool Volume (US GALLON)	12 000	17 000
Maximum Pool Volume (LITRE)	46 000	63 000
Operating Air Temperature	(23°F - 109°F) / (-5°C - 43°C)	(23°F - 109°F) / (-5°C - 43°C)
